

Siloam's OptiMax™ Plates + Tecan Freedom EVO® Workstation

= Outstanding Efficiency & Performance

Siloam Biosciences' OptiMax™ microplates, based on the Optimiser™ technology platform, combined with Tecan's Freedom EVO® workstation allow you to perform rapid, highly sensitive ELISAs while keeping your sample uptake to an absolute minimum.

Highly Sensitive & Highly Efficient!

- Improved automation workflow – no washers/incubators needed
 - Process twice as many plates per run
 - Unattended operation
- 13 minute sandwich ELISAs
- Sample size < 2 ul /data point
- Tune sensitivity up to 1,000 fold over conventional ELISA method
- 10-20 fold reagent savings
- PROGRAM assay for speed, sensitivity or precious sample
- A universal immunoassay solution

Ask about how Optimax™ automation plates can also provide **added flexibility for your BioTek semi-automated system!**

Siloam and Tecan can improve your immunoassay performance instantly!
